How Do You Find Surface Area of Pyramids?

(Topic #2)

Even though many well-known pyramids have square bases, the base of a pyramid can be any polygon.

Triangular Base

Square Base

Hexagonal Base

A **regular pyramid** is a pyramid whose base is a regular polygon. The lateral faces are triangles. The height of each triangle is the **slant height** of the pyramid.

Surface Area of a Pyramid

The surface area of a pyramid is the sum of the areas of the base and the lateral faces.

$$S = \text{area of base} + \text{areas of lateral faces}$$

EXAMPLE 1: Finding the Surface Area of a Square Pyramid

Find the surface area of the regular pyramid.

PRACTICE:

1. What is the surface area of a square pyramid with a base side length of 9 centimeters and a slant height of 7 centimeters?

Show work below.

EXAMPLE 2: Finding the Surface Area of a Triangular Pyramid

Find the surface area of the regular pyramid .

How Do You Find Surface Area of Pyramids?

(Topic #2)

Even though many well-known pyramids have square bases, the base of a pyramid can be any polygon.

Triangular Base

Square Base

Hexagonal Base

A **regular pyramid** is a pyramid whose base is a regular polygon. The lateral faces are triangles. The height of each triangle is the **slant height** of the pyramid.

Surface Area of a Pyramid

The surface area of a pyramid is the sum of the areas of the base and the lateral faces.

$$S = \text{area of base} + \text{areas of lateral faces}$$

EXAMPLE 1: Finding the Surface Area of a Square Pyramid

Find the surface area of the regular pyramid.

Base

$$\begin{aligned} A &= s^2 \\ &= 5^2 \\ &= 25 \end{aligned}$$

Face

$$\begin{aligned} A &= \frac{1}{2}bh(4) \\ &= \frac{1}{2}(5)(8)(4) \\ &= 80 \end{aligned}$$

$$\begin{aligned} SA &= 25 + 80 \\ &= 105 \text{ in}^2 \end{aligned}$$

PRACTICE:

1. What is the surface area of a square pyramid with a base side length of 9 centimeters and a slant height of 7 centimeters?

Show work below.

$$\begin{aligned} \text{Base} \\ \hline A &= s^2 \\ &= 9^2 \\ &= 81 \end{aligned}$$

$$\begin{aligned} \text{Face} \\ \hline A &= \frac{1}{2}bh \\ &= \frac{1}{2}(9)(7) \\ &= 31.5 \end{aligned}$$

$$\begin{aligned} SA &= 81 + 31.5 + 31.5 + 31.5 + 31.5 \\ &= 207 \text{ cm}^2 \end{aligned}$$

EXAMPLE 2: Finding the Surface Area of a Triangular Pyramid

Find the surface area of the regular pyramid .

$$\begin{aligned} \text{Base} \\ \hline A &= \frac{1}{2}bh \\ &= \frac{1}{2}(10)(8.7) \\ &= 43.5 \end{aligned}$$

$$\begin{aligned} \text{Face} \\ \hline A &= \frac{1}{2}bh \\ &= \frac{1}{2}(10)(14) \\ &= 70 \end{aligned}$$

$$\begin{aligned} SA &= 43.5 + 70 + 70 + 70 \\ &= 253.5 \text{ m}^2 \end{aligned}$$

HOMEWORK - (Topic #2)

Finding Surface Area of a Pyramid

Find the surface area of the regular pyramid.

1.

$$\begin{aligned} \text{Base} \\ A &= s^2 \\ A &= 11^2 \\ A &= 121 \end{aligned}$$

$$\begin{aligned} \text{FACE} \\ A &= \frac{1}{2}bh \\ A &= \frac{1}{2}(11)(14) \\ A &= 77 \end{aligned}$$

$$\begin{aligned} SA &= 121 + 77 + 77 + 77 + 77 \\ &= 429 \text{ cm}^2 \end{aligned}$$

2.

$$\begin{aligned} \text{Base} \\ A &= \frac{1}{2}bh \\ A &= \frac{1}{2}(9)(7.8) \\ A &= 35.1 \end{aligned}$$

$$\begin{aligned} \text{Face} \\ A &= \frac{1}{2}bh \\ A &= \frac{1}{2}(9)(8) \\ A &= 36 \end{aligned}$$

$$\begin{aligned} SA &= 35.1 + 36 + 36 + 36 \\ &= 143.1 \text{ yd}^2 \end{aligned}$$

3.

$$\begin{aligned} \text{Base} \\ A &= \frac{1}{2}bh \\ A &= \frac{1}{2}(6)(5.2) \\ A &= 15.6 \end{aligned}$$

$$\begin{aligned} \text{FACE} \\ A &= \frac{1}{2}bh \\ A &= \frac{1}{2}(6)(12) \\ A &= 36 \end{aligned}$$

$$\begin{aligned} SA &= 15.6 + 36 + 36 + 36 \\ &= 123.6 \text{ ft}^2 \end{aligned}$$
